

Please use below script for instead.

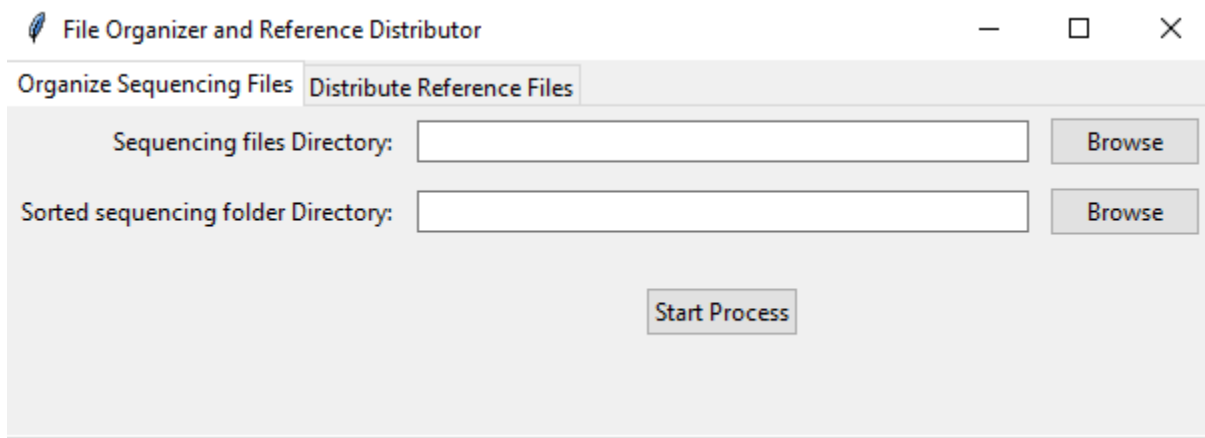

C:\Users\User\Desktop\Python Script\Gene\_Script\Sequencing Folder and File Sorting (You need to run the script on my computer)

Gene_Script > Sequencing Folder and File Sorting >					Search Sequencing Folder ...
Name		Date modified	Type	Size	
old		7/25/2024 8:06 AM	File folder		
Gene_file_organizer		7/24/2024 10:52 AM	Python Source File	10 KB	

Or the exe file in Z:\Gene Synthesis\3.0 In-House Gene\3.6 QC (You can use this script on your computer, but it might take some time for loading the script.)

esis > 3.0 In-House Gene > 3.6 QC					Search 3.6 QC
Name		Date modified	Type	Size	
3.6.0 Sg check		7/24/2024 9:22 PM	File folder		
3.6.1 Compiling		7/24/2024 3:43 PM	File folder		
3.6.2 Send to SG		7/16/2024 11:21 AM	File folder		
3.6.3 Received by BBI		7/23/2024 4:25 PM	File folder		
3.6.4 Uploaded		7/24/2024 6:18 PM	File folder		
3.6.5 Testing		3/22/2024 11:16 AM	File folder		
3.6.6 QC Templates and Examples		7/3/2024 3:21 PM	File folder		
3.6.7 Images		7/24/2024 3:17 PM	File folder		
3.6.X Reference files		7/24/2024 9:02 PM	File folder		
3.6.Y Sequencing files		7/24/2024 7:25 PM	File folder		
3.6.Z Sorted sequencing		7/24/2024 9:05 PM	File folder		
3.6.ZA Sg OK		7/16/2024 12:04 PM	File folder		
obsolete		6/22/2024 10:33 AM	File folder		
WGK0145KST QC word docs		7/5/2024 5:16 PM	File folder		
File_names_v4		6/21/2024 11:28 AM	Microsoft Excel W...	825 KB	
Gene_file_organizer		7/24/2024 10:56 AM	Application	51,459 KB	
Seq		4/24/2024 10:41 AM	Microsoft Word D...	721 KB	
Tename		6/11/2024 11:51 AM	Application	37,875 KB	

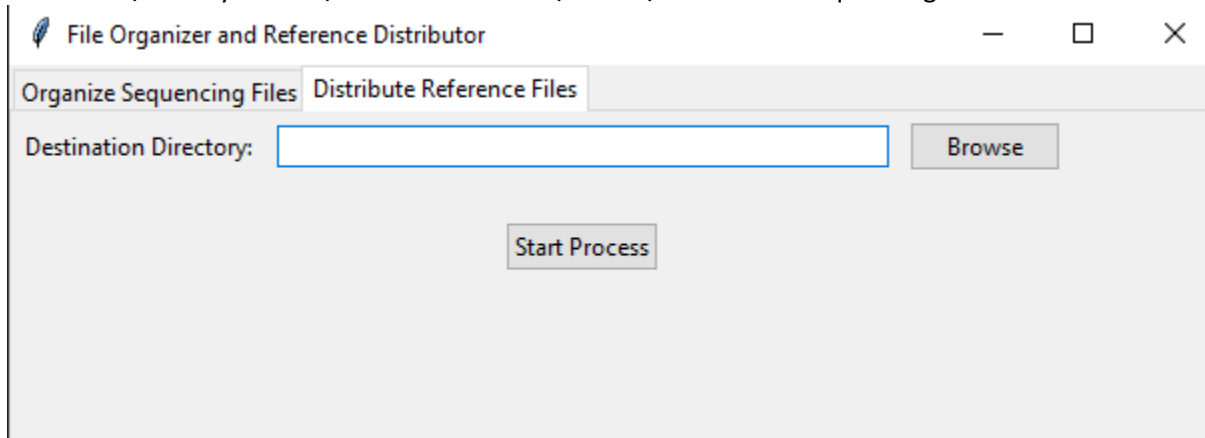

After you run the script you will see the graphic user interface like this:

The screenshot shows a Windows-style window titled 'File Organizer and Reference Distributor'. It has two tabs: 'Organize Sequencing Files' (selected) and 'Distribute Reference Files'. Under the 'Organize Sequencing Files' tab, there are two input fields. The first is labeled 'Sequencing files Directory:' and the second is labeled 'Sorted sequencing folder Directory:'. Each field has a 'Browse' button to its right. Below these fields is a 'Start Process' button.

Script 1 path:

1. Z:\Gene Synthesis\3.0 In-House Gene\3.6 QC\3.6.Y Sequencing files
2. Z:\Gene Synthesis\3.0 In-House Gene\3.6 QC\3.6.Z Sorted sequencing

The screenshot shows the same window, but with the 'Distribute Reference Files' tab selected. It features a single input field labeled 'Destination Directory:' with a 'Browse' button to its right. A 'Start Process' button is located below the input field.

Script 2 path:

1. Z:\Gene Synthesis\3.0 In-House Gene\3.6 QC\3.6.Z Sorted sequencing

Let me know if you have any question on using the new script. Thanks.
